

VAT Compliance

We have been helping everyone from start-ups to established small businesses by assessing and minimising the impact that VAT (Value Added Tax) could have on their business finances as well as completing and submitting VAT returns on their behalf.

Value added tax is one of the most complex and onerous tax regimes imposed on business - so complex that many businesses inadvertently overpay or underpay VAT.

The ever widening scope of VAT, the constant stream of detailed changes to the regulations, and the ever growing demands of Customs and Excise call for a trained professional eye to ensure that you do not fall foul of the regulations and do not pay the Exchequer more than you need to.

We provide an efficient cost effective VAT service, which includes:

- Assistance with VAT registration
- Advice on VAT planning and administration
- Use of the most appropriate scheme
- VAT control and reconciliation
- Help with completing (or checking) VAT returns
- Planning to minimise future problems with Customs and Excise
- Advice on trading within the EU and 'reverse charge' VAT

If you would like to discuss any aspect of VAT please call us today on 020 8868 2022 or email U2us@tad-as.com for a call back.
